Azeus Environmental Policy

Azeus recognizes that day-to-day operations can have direct and indirect impact on the environment. Azeus will work to consider and integrate measures to protect the environment and conserve resources into our business decisions and adopt "greener" alternatives that reduce environmental impact wherever possible, throughout all our operations.

We will maintain environmentally sound practices within all departments, including recycling, reduction of energy consumption and natural resources as well as proper disposal of waste materials.

We are committed to:

- Complying with all applicable laws, regulations and statutory obligations relating to environmental issues.
- Managing environmental and related issues in accordance with any client requirements, policies and procedures and involve customers, partners, clients, suppliers and subcontractors in the implementation of our objectives.
- Maintaining, monitoring, reporting, reviewing, auditing and continually improving Environmental Management System and programs.
- Improving the environmental efficiency of our transport and travel.
- Conserving natural resources by reducing water usage and applying waste minimization principles; by reusing and recycling materials, purchasing recycled materials, and using recyclable packaging and other materials.
- Promoting environmentally responsible purchasing.
- Ensuring the responsible use of energy throughout our business, including conserving energy, improving energy efficiency, and giving preference to renewable over non-renewable energy sources when feasible.
- Educating and training our people to continually improve awareness, skills and knowledge of environmental issues and practices.

- Establishing targets to measure the continuous improvement of our environmental performance and review them annually.
- Being an environmentally responsible neighbor in the communities where we operate and in satisfying customer requirements

Azeus is committed, up to the senior management level, to operational and management policies that minimize environmental impact and ensure compliance with environmental and energy related legislation.

All Azeus employees and contractors are expected to follow this policy. They are also expected to report any environmental concerns to Azeus management; and in turn, managers are expected to take prompt action regarding reported concerns. This policy is reviewed annually and revised to reflect changing conditions and information.

The Azeus Environmental Management System is compliant with ISO 14001:2015.
